

PEPTIDE THERAPY

PDRN + GHK-Cu

This combination is present at every stage of the line and is supported by ingredients tailored to each need: scalp cleansing and care, reconstruction of weakened hair, lipid replenishment, and thermal smoothing.

shampoo

PEPTIDE THERAPY

Developed for hair therapy routines, Peptide Therapy Shampoo combines the copper peptide GHK-Cu and PDRN in a formula that cleanses the scalp while caring for the hair. It also addresses the needs of hair experiencing thinning and loss of vitality, preparing it for the next stages of treatment.

Enriched with hydrolysed keratin and sunflower oil, it helps condition the hair fibre, improves softness and makes combing easier. This cleansing step goes beyond preparation, placing care at the roots.

How to use:

1. Apply Peptide Therapy Shampoo to wet hair, gently massaging the scalp and hair until it lathers.
2. Rinse well and repeat if necessary.
3. For best results, use the complete Peptide Therapy line.

reconstructor

PENETRATE COMPLEX

Penetrate Complex combines PDRN, the copper peptide GHK-Cu and hydrolysed keratin in a reconstructive treatment for hair damaged by chemical processes and bleaching. The blend brings the line's regenerative-care concept together with support for the hair's strength, flexibility and texture.

Its formula also contains lactic acid, pracaxi, grape and sunflower oils, and shea butter for conditioning, nourishment and care of the hair surface. It helps leave hair feeling more even, soft and glossy while linking the reconstructive step with lipid replenishment.

How to use:

1. After washing with Peptide Therapy Shampoo, remove excess water.
2. Apply the reconstructor from mid-lengths to ends.
3. Massage section by section, leave for 5 to 10 minutes, then rinse thoroughly.
4. For greater softness, apply Melt Mask, leave for 5 minutes, then rinse thoroughly.
5. For best results, use the complete Peptide Therapy line.

melt mask

MELT MASK

Melt Mask combines lipid replenishment with the line's PDRN and GHK-Cu copper peptide technology in a treatment for dry, rough hair lacking movement. Its formula brings together nourishing care and conditioning to soften the hair's texture and improve its appearance.

Sunflower oil, rich in fatty acids, contributes nourishment and softness, while panthenol helps maintain hydration. Conditioning agents and silicones complete the treatment, helping detangle, reduce frizz and leave a silky, radiant finish.

How to use:

1. After washing with Peptide Therapy Shampoo, remove excess water.
2. Apply Melt Mask section by section, working it through from mid-lengths to ends.
3. Leave for 3 to 5 minutes, then rinse thoroughly.
4. For best results, use the complete Peptide Therapy line.

acidifying treatment

INFUSION RESTORE

Infusion Restore Acidifying Treatment combines Filcortex, PDRN and the copper peptide GHK-Cu in a thermal smoothing system that pairs a straightening effect with care for the integrity of the hair fibre. Its blend of hydrolysed proteins and amino acids complements the treatment, helping hair feel more disciplined and flexible.

Enriched with hyaluronic acid, ferulic acid, coenzyme Q10 and pracaxi, tucuma and andiroba oils, it combines hydration, antioxidant action and nourishment. It controls frizz and volume and gives intense shine and a silky feel, with flexible ends and natural movement.

How to use:

1. Apply section by section, working the product through carefully for even distribution.
2. Leave on for 40 to 60 minutes.
3. Rinse thoroughly, removing 100% of the product from the hair.
4. Apply Melt Mask and leave for 5 minutes.
5. Rinse completely.
6. Towel off excess water and blow-dry while the hair is damp.
7. Once completely dry, finish with a flat iron.

benefits

INGREDIENT BENEFITS

PDRN - Sodium DNA. Part of the line's regenerative-care concept; helps improve the appearance of damaged hair and maintain healthier-looking hair.

Copper peptide - GHK-Cu. Part of the line's regenerative-care concept; helps improve the appearance of damaged hair and maintain healthier-looking hair.

Hydrolysed keratin. Present in Peptide Therapy Shampoo and Penetrate Complex; helps condition and care for damaged hair.

Sunflower oil. Present in the shampoo, mask and reconstructor; contributes nourishment, softness and shine.

Panthenol - provitamin B5. Present in Melt Mask; helps maintain hydration and improves the feel and manageability of hair.

Vegetable oils and shea butter. In Penetrate Complex, they add softness and nourishment, helping improve the appearance of dry hair.

THE TECHNOLOGY THAT CELEBRATES THE BEAUTY OF YOUR HAIR.
